

* String palindrome check *

• Algorithm •

Step 1	Start
Step 2	Read string
Step 3	length = strlen(line)
Step 4	Repeat for (i = 0 to line[i] != '\0' if (line[i] == line[length - i - 1]) flag ++ else Print string not palindrome break ;
Step 5	Check if flag != 0 print string is palindrome.
Step 6	Stop
